- ◆ Java
- ◆ JavaScript
- ◆ TypeScript
- ◆ React
- ◆ Laravel
- ◆ Git
- ◆ Linux
- ◆ Angular
- ◆ CSS

Professional Background

Frontend Engineer

NTT DATA

March 2023 – June 2024

📍 Alicante

Throughout this process, I engaged in code refactoring, application maintenance, and bug resolution to enhance the efficiency, stability, and functionality of user interfaces. Additionally, I utilized technologies such as React for developing dynamic and interactive components, Git for version control, Chakra for designing and implementing consistent and accessible user interfaces, and Jotai for intuitive and effective application state management.

Personal Projects

Fullstack MERN E-Commerce 🔄

Mongo DB, Express, React, Nodejs

A full MERN e-commerce app with secure auth (access/refresh tokens), admin product & category management, and OTP-based email verification and password recovery, built for scalability, performance, and smooth UX.

Asynchronous Shopping Cart 🔄

PHP, JavaScript, MySQL

An AJAX-powered PHP shopping cart for adding, updating, and removing items in real time without page reloads.

Angular Task Manager App 🔄

Angular, JavaScript

Angular Task Manager App is a dynamic and responsive web application designed to help users efficiently organize and manage their daily tasks.

React Weather App 🔄

React, JavaScript

Weather app that delivers real-time weather updates and forecasts
